

Agri-FM+: A Self-Supervised Foundation Model for Agricultural Vision

Md Jaber Al Nahian, Tapotosh Ghosh, Farnaz Sheikhi, Farhad Maleki
University of Calgary, Calgary, AB, Canada

Motivation

- ✓ Foundation models (e.g., CLIP, DINO, SAM) underperform in agriculture
- ✓ Agricultural tasks require fine-grained, domain-specific understanding
- ✓ Existing FMs lack robustness to diverse field conditions

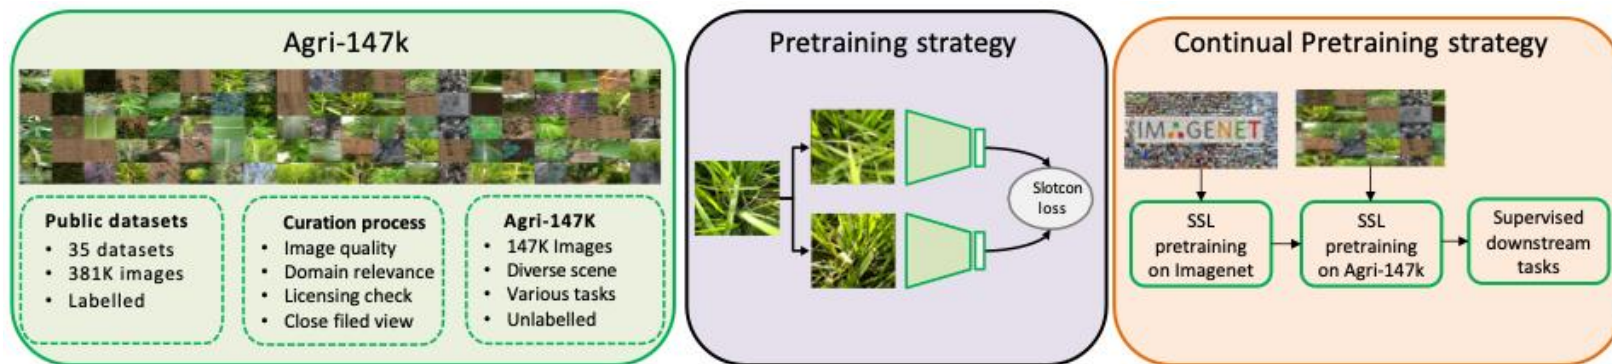

Our goal: Build a self-supervised, label-efficient foundation model for close-field agricultural vision

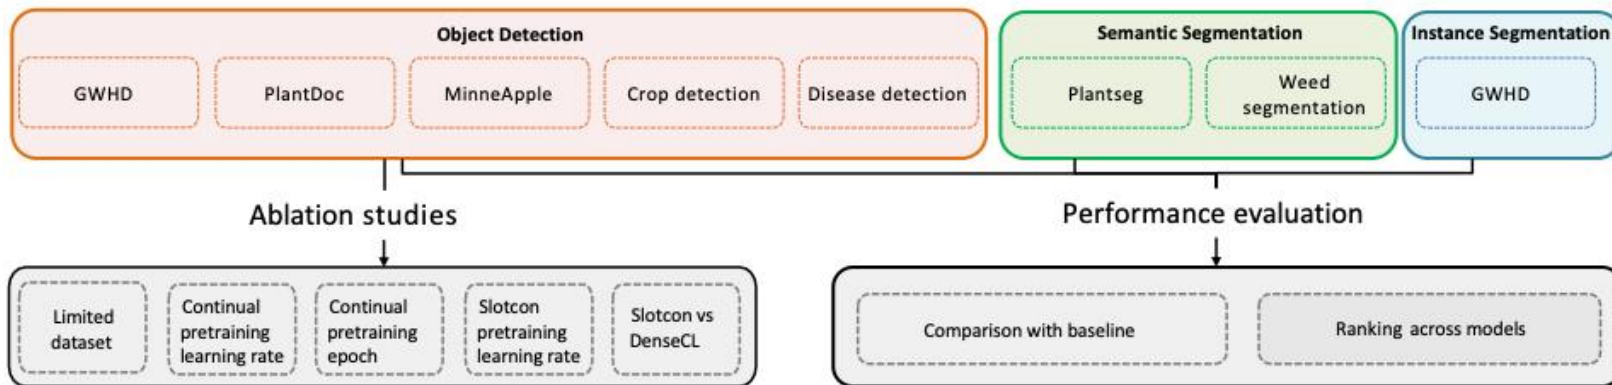

Key Contributions

- ✓ Curated **Agri-147K**: 147K high quality, diverse agricultural images from 35 public datasets
- ✓ Introduced **Agri-FM+**: first agricultural vision foundation model for **close-field** tasks
- ✓ Extensive evaluation: 8 datasets across object detection, semantic and instance segmentation

Methodology

Downstream applications

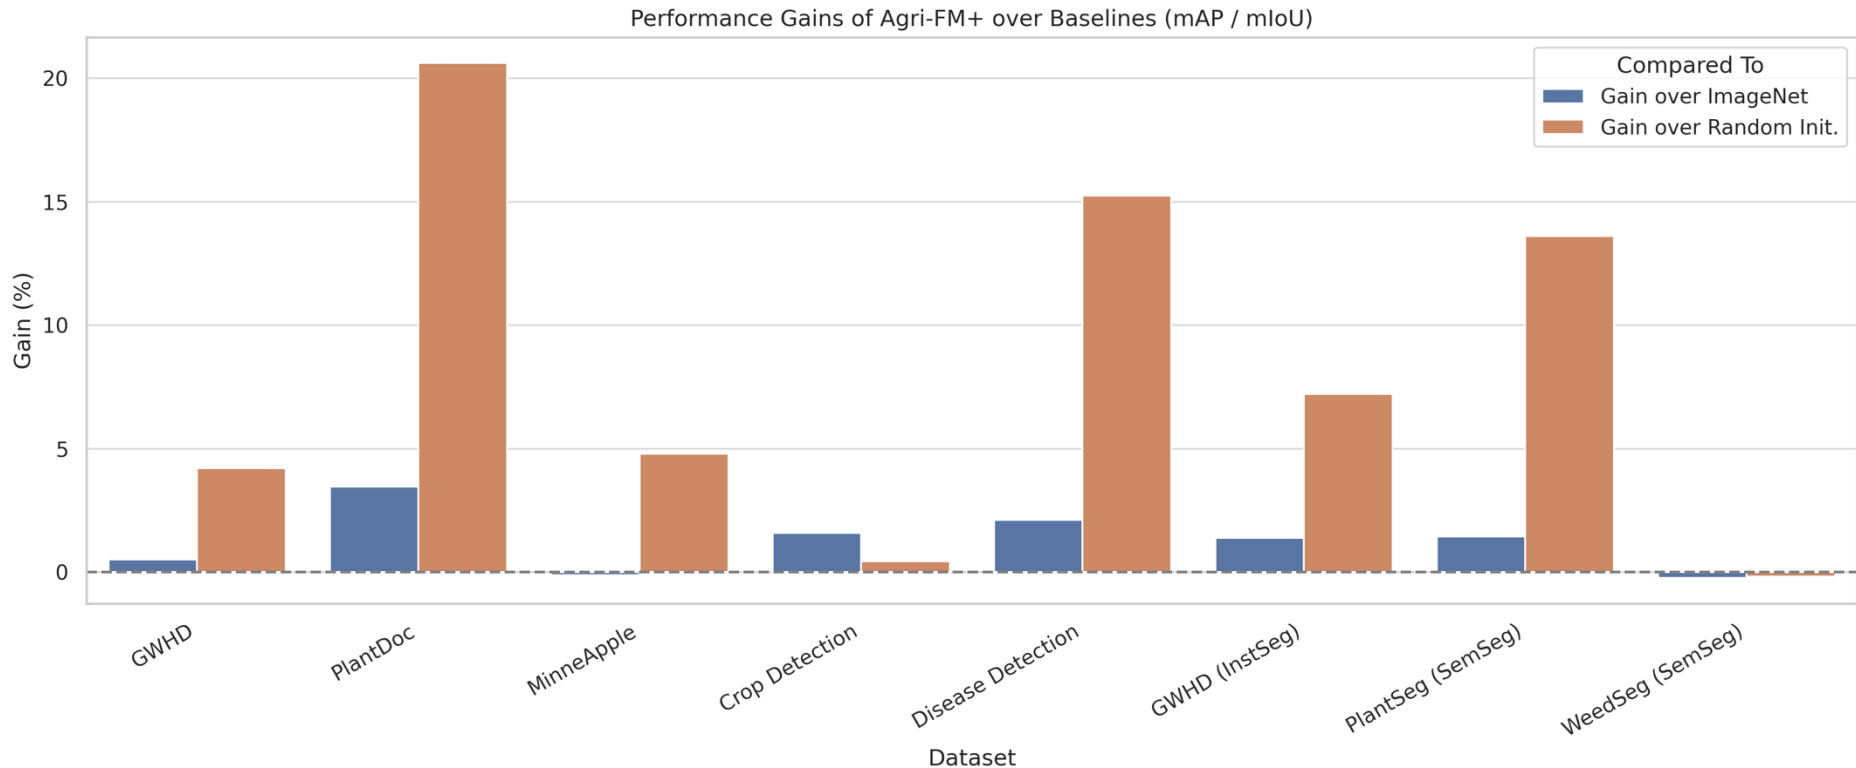

Agri-FM+ Outperform Across All Tasks

Pretrained ResNet-50 Weight	Object Det. (<i>mAP</i>)					Instance Seg. (<i>mAP</i>)	Semantic Seg. (<i>mIoU</i>)	
	GWHD	PlantDoc	MinneApple	Crop Det.	Disease Det.	GWHD	PlantSeg	Weed Seg.
Random Init.	44.27	20.99	35.61	32.96	34.57	66.26	16.15	95.13
Supervised ImageNet	47.97	38.15	40.53	31.81	47.71	72.09	28.31	95.17
Agri-FM	48.18	38.53	38.21	30.01	47.90	72.41	28.07	95.87
Agri-FM+	48.48	41.61	40.41	33.41	49.83	73.48	29.76	94.95

Ablation on Limited Annotation Scenario

Pretrained ResNet-50 Weight	GWHD (<i>mAP</i>)			PlantDoc (<i>mAP</i>)			MinneApple (<i>mAP</i>)			Disease Detection (<i>mAP</i>)		
	5%	10%	20%	5%	10%	20%	5%	10%	20%	5%	10%	20%
Random Init.	34.57	38.32	41.91	3.72	6.19	10.84	19.82	25.81	27.11	15.94	19.13	26.16
Supervised ImageNet	38.33	39.71	41.99	9.17	17.97	22.92	23.25	28.55	32.52	22.46	27.29	36.31
Agri-FM	37.92	39.41	41.29	9.16	15.04	19.79	21.44	28.96	32.61	20.62	25.71	34.98
Agri-FM+	39.24	40.41	42.44	10.73	18.09	24.22	22.08	30.01	33.21	23.18	29.09	37.06

Performance Gains (%) of Agri-FM+ over ImageNet and Random Init.

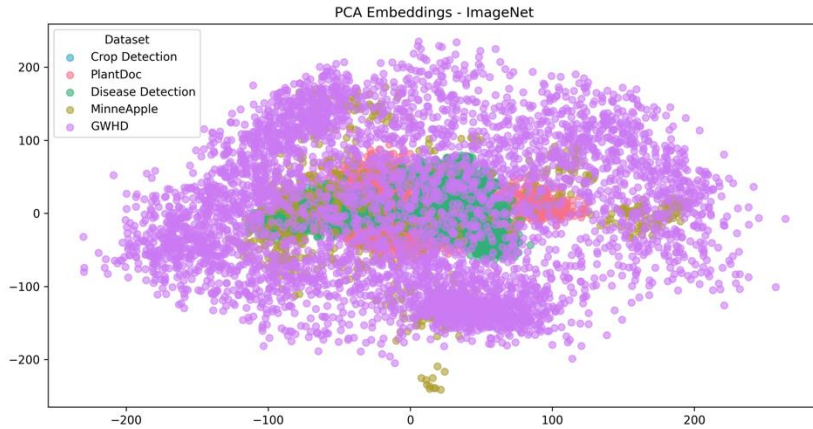

Consistent Top Rankings of Agri-FM+ Across Multiple Vision Tasks

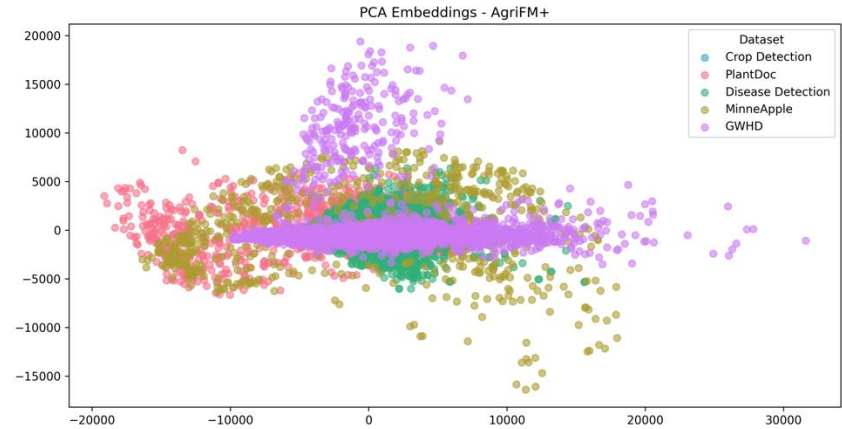

Improved Feature Clustering with Agri-FM+

Feature Representation of ImageNet vs Agri-FM+

ImageNet

Agri-FM+

Results Highlights

- ✓ Benchmarked on **8 datasets** across detection, segmentation, and instance segmentation
- ✓ In fully labeled setup: **+1.27% over ImageNet, +8.25% over random init.**
- ✓ In low-label setup (10%): **+1.02% over ImageNet, +4.54% over random init**
- ✓ Agri-FM+ ranks **1st in 6 of 8 tasks**

Key Takeaways

- ✓ Agri-FM+ is the first self-supervised foundation model for agricultural vision
- ✓ Demonstrates strong **domain adaptation**, **generalization**, and **label efficiency**
- ✓ Visit our poster to learn more!
